This test is primarily designed for Hitachi Vantara customers who use and administer Hitachi Content Platform systems to preserve and protect data. It is also available to Hitachi Vantara employees and partners. The test will validate that the successful candidate has knowledge of system configuration and recommended management practices that relate to administering an HCP system in a customer environment. The test covers Hitachi Content Platform (HCP).

Audience: Hitachi Vantara Customer, Partner, and Employee HCP Administrators

HCP administrators should have knowledge of networking, object storage and object replication concepts. They are responsible for planning network connectivity, creating tenants and configuring namespaces, managing user roles and permissions, managing services and searches, and instituting disaster-recovery processes. HCP administrators should also have knowledge of operating systems, access protocols to Cloud, REST API and S3 API.
